Poly carboxylic acid high performance water reducing agent

Poly carboxylic acid high performance water reducing agent is a new research and development of the company with "comb" structure characteristics of a new generation of high performance water reducing agent, compared with naphthalene series high efficient water reducing agent, it has a small dosage, high water reducing rate, good slump retention, no shrinkage and other characteristics, can greatly improve the fluidity of concrete after use at the same time can improve the workability of concrete and the physical and mechanical performance, improve the quality of engineering.

Product advantages

It has good compatibility with different kinds of cement admixtures (the main chain of the synthetic mother liquor, the length of the side chain can be adjusted).

Low dosage, high water reduction rate, shrinkage, with a better cost performance.

The concrete works well and has little slump loss, so it is more suitable

for long-distance transportation and pumping construction in commercial concrete stations.

The concrete mixed with Poly carboxylic acid high performance water reducing agent has remarkable strength enhancement effect in the early and later stages.

Poly carboxylic acid high performance water reducing agent has low chloride ion content, low alkali content and no formaldehyde. It conforms to ISO14000 national standard of environmental protection management and is a green environmental protection product.

Application scope

1. It is applicable to precast and cast-in-place concrete, reinforced concrete and prestressed concrete for construction of high-speed railway, passenger dedicated line, expressway, commercial concrete station, port and wharf, hydropower station, airport and other projects.
- 2, especially suitable for the configuration of concrete construction time long, the concrete slump to maintain high requirements of the project, such as nuclear power project.

Service

1. Professional design team and sales department for your service.
2. service for you professionally, all the question will be deal with within 24hours.
3. We have a lot of inventory, You can receive the goods in a short period of time.
4. We sell in the lowest factory price, but good quality!
